

LANDINGS AND STEPS OF SLIDE LADDERS

LOCATION

Water parks in Hawaiian style located on Italy's Tyrrhenian Coast. The water parks cover a total surface of about 150.000 m² and include slides, swimming pools with waterfalls and rivers, show-venues, in a family-friendly environment.

CLIENT

Company working in the field of creation and operation of water and theme parks.

LOCATION TUSCANY

USE LADDERS AND LANDINGS FOR WATER SLIDES

PRODUCT GRATING IN SELF-EXTINGUISHING RESIN SCH 52/52C AND SCH 38/25C, COVERED, ANTI-SKID, WITH Q-PAINT FINISHING, BROWN.

OBJECTIVE

The client needed a product for the landings and the steps of all slide ladders in the above mentioned water parks.

There were three targets:

- maximum safety;
- minimum maintenance;
- a certain aesthetic level.

SOLUTION

M.M. delivered more than 200m² covered gratings, with Q-Paint finishing (Marinadeck), for the steps and the landings of all slide ladders.

Marinadeck was developed by M.M and it is characterized by high resistance to temperature leaps and UV-rays, as well as by low water absorption and thermal expansion.

Since it does need to be periodically varnished, it is easy to clean and resistant to fungus and algae, Marinadeck is maintenance free. The Q-paint finishing guarantees antiskid properties according to DIN 51097 (suitable for bare feet).
